British Columbia External Trade Report 1988

90-000787

MESSAGE FROM THE MINISTER

It is my pleasure to present the 1988 edition of the *British Columbia External Trade Report*, an important reference document detailing British Columbia's export performance.

With 26 per cent of our gross provincial product in foreign exports, trade is already an essential component of our economy. Its importance will continue to grow as the Canada-U.S. Trade Agreement is brought into effect and as more world trade barriers are dismantled through the General Agreement on Tariffs and Trade (GATT).

The *British Columbia External Trade Report* contains statistical tables of British Columbia and total Canadian exports to all countries and specifically to the United States, Japan, the United Kingdom and the European Community. The information contained in this report will help British Columbians continue to identify and develop future export opportunities.

If you have any questions about this report, or if you require more detailed information on British Columbia's foreign trade, please contact my staff at the address below:

Detailed Table

B.C. Origin and Total Canadian Exports
Commodity by Country—1988 13

INTRODUCTION

The British Columbia *External Trade Report* presents summary and detailed statistical tables listing the province's exports by commodity and country of destination. Also included are graphs indicating the relative importance of major export commodities in 1988 and trends in exports to the most important trading partners.

A large, detailed commodity table presents export totals for individual commodities and also the exports to particular countries for each commodity listed.

In the summary tables, statistics are shown for total value of exports to the major export destinations and the value of exports of major commodity types for each of these countries.

No detailed statistics are available on **foreign imports consumed in British Columbia**. Summary estimates of the total value of imports consumed in British Columbia, without commodity or country detail, are available in the *British Columbia Economic Accounts* publication available from the Central Statistics Bureau. Also available on request are detailed statistics on Canadian imports cleared through British Columbia customs ports. However, these data do not generally provide good indicators of imports actually consumed in British Columbia.

NOTES

Export Valuation:

The values identified in export statistics reflect the values declared on the Revenue Canada export documents from which they are compiled. These usually reflect the transaction value—i.e. the actual selling price, or in the case of non-arm's length transactions, the transfer price used for company accounting purposes. Most exports to countries other than the U.S.A. are valued at Free on Board (FOB) port of exit including domestic freight charges to that point but net of discounts and allowances. Exports to the U.S.A. are valued FOB place of lading net of freight charges, discounts and allowances.

Commodity Classification:

Export and import statistics are both classified according to the international Harmonized System of commodity classification (HS). Developed by the Customs Cooperative Council, the HS is the same for all countries using it for both exports and imports, down to the six-digit level of detail. More specific commodity groups below the

six-digit level can be added by individual countries. Canada has added detail down to eight digits for exports and 10 digits for imports.

The first principle of classification used in the HS is the nature of the commodity—not its stage of fabrication, where it is made or other criteria. The System is logically structured by economic activity or component material. Animal and plant products, for example, are found in one section; machinery and mechanical appliances, grouped by function, are found in another.

The HS was adopted by Canada in January of 1988 so that only trade data beginning in 1988 are available in HS format. Canadian data for earlier years was commodity coded to the Export Commodity Classification or the Canadian International Trade Classification for imports. HS data cannot be linked with earlier trade data except at the relatively high level of commodity classification termed Summary Export and Import Groups.

Country of Destination of Exports:

Countries indicated as the destinations of exports are those recorded on the export customs documents. In the great majority of cases, these will be the countries in which the goods are actually consumed. However, in those instances where goods are warehoused in third countries for a period of time before distribution, statistics may record the exports as destined for the warehousing country, rather than the country or countries in which the goods are actually consumed.

Additional External Trade Statistics Available

More detailed trade statistics are available through the following offices:

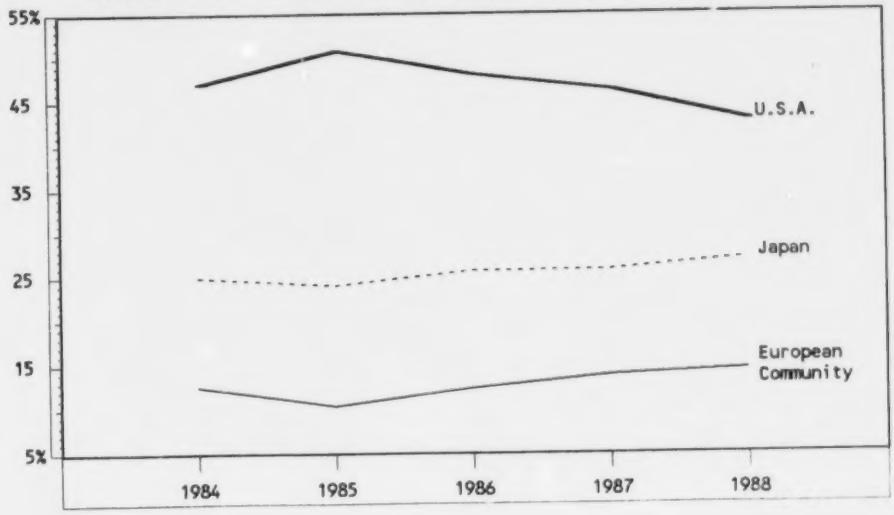
Ministry of International Business and Immigration
Trade and International Economic Policy Division
727 Johnson Street
Victoria, British Columbia
V8W 1M8 Tel: (604) 356-8046

Ministry of Finance and Corporate Relations
Central Statistics Bureau
2nd Floor, 1405 Douglas Street
Victoria, British Columbia
V8W 3C1 Tel: (604) 387-0325

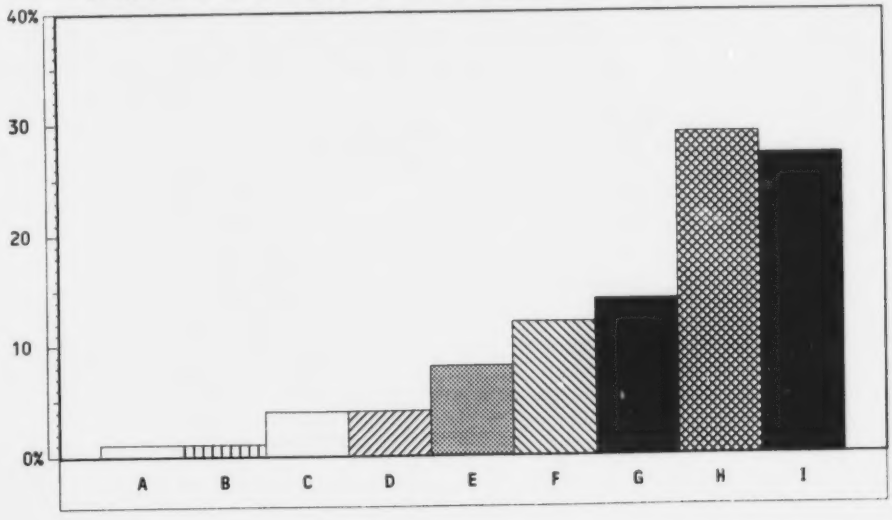
Among the additional information available are country by commodity tabulations, exports to individual U.S. states and commodities at fine levels of detail.

B.C. ANNUAL EXPORTS (PERCENT)

MAJOR B.C. EXPORT DESTINATIONS (1984 - 1988)



MAJOR B.C. EXPORT COMMODITIES (1988)



A: Natural Gas
B: Agri-Food
C: Fisheries
D: Mach & Equipt
E: Coal
F: Metallic Minerals
G: Other
H: Pulp, Wood Chips & Paper
I: Lumber & Other Wood

(Percentages based on values of exports)
